HÖGLWALD RESEARCH – BIOLOGICAL EFFECTS OF ACIDIFICATION AND LIMING ON A NITROGEN SATURATED ECOSYSTEM OF *PICEA ABIES* (L., KARST.)

Guest editors: K. Kreutzer and T. Weiss
University of Munich, Freising, Germany

The Höglwald field experiments – aims, concept and basic data
K. Kreutzer and T. Weiss **1–10**

Effect of acid irrigation and liming on root growth of Norway spruce
G. Hahn and H. Marschner **11–22**

Cation concentrations of short roots of Norway spruce as affected by acid irrigation and liming
G. Hahn and H. Marschner **23–27**

Effect of artificial soil acidification and liming on growth and nutrient status of mycorrhizal roots of Norway spruce (*Picea abies* [L.] Karts.)
I. Nowotny, J. Dähne, D. Klingelhöfer and G.M. Rothe **29–40**

Influence of soil acidification and liming on selected enzymes of the carbohydrate metabolism and the contents of two major organic acids of mycorrhizal roots of Norway spruce (*Picea abies* [L.] Karst.)
I. Nowotny, J. Schwanz and G.M. Rothe **41–51**

Callose in roots of Norway spruce (*Picea abies* (L.) Karst.) is a sensitive parameter for aluminium supply at a forest site (Högwald)
A.H. Wissemeier, G. Hahn and H. Marschner **53–57**

Effects of acid irrigation and liming on nitrate reduction and nitrate content of *Picea abies* (L.) Karst. and *Oxalis acetosella* L.
G. Gebauer, G. Hahn, H. Rodenkirchen and M. Zuleger **59–70**

The effect of acid irrigation on enzyme activities of the single partners of ectomycorrhizas from a limed stand of Norway spruce (*Picea abies* [L.] Karst.)
M. Guttenberger, H. Zick, H. Thelen, T. Wallenda and R. Hampp **71–81**

Effects of acid irrigation and liming on the production of fruit bodies by ectomycorrhizal fungi
R. Agerer, A.F.S. Taylor and R. Treu **83–89**

Activity of different ectomycorrhizal types studied by vital fluorescence
X.M. Qian, I. Kottke and F. Oberwinkler **91–98**

Influence of liming and acidification on the activity of the mycorrhizal communities in a *Picea abies* (L.) Karst. stand
X.M. Qian, I. Kottke and F. Oberwinkler **99–109**

Studies of pathogenic and antagonistic microfungal populations and their potential interactions in the mycorrhizoplane of Norway spruce (*Picea abies* (L.) Karst.) and beech (*Fagus sylvatica* L.) on acidified and limed plots
X.M. Qian, A. El-Ashker, I. Kottke and F. Oberwinkler **111–116**

The influence of acid irrigation and liming on the soil microbial biomass in a Norway spruce (*Picea abies* [L.] K.) stand
T.-H. Anderson **117–122**

A Most Probable Number method (MPN) for the estimation of cell numbers of heterotrophic nitrifying bacteria in soil
H. Papen and R. von Berg **123–130**

Influence of acid rain and liming on fluxes of NO and NO_2 from forest soil
H. Papke and H. Papen **131–139**

Evidence for a nutritional disorder of *Oxalis acetosella* L. on acid forest soils I. Control situation and effects of dolomitic liming and acid irrigation
H. Rodenkirchen **141–152**

Evidence for a nutritional disorder of *Oxalis acetosella* L. on acid forest soils II. Diagnostic field experiments and nutrient solution studies
H. Rodenkirchen **153–166**

Changes in soil structure and aeration due to liming and acid irrigation
H. Schack-Kirchner and E.E. Hildebrand **167–176**

REGULAR PAPERS

Early phosphorus nutrition, mycorrhizae development, dry matter partitioning and yield of maize
M.E. Gavito and M.H. Miller **177–186**

Root distribution following spatial separation of water and nitrogen supply in furrow irrigated corn
R.H. Skinner, J.D. Hanson and J.G. Benjamin **187–194**

Fate of ^{15}N labelled urine on four soil types
T.J. Clough, S.F. Ledgard, M.S. Sprosen and M.J. Kear **195–203**

Effects of nutrient addition on growth and rhizosphere pH of *Leucadendron* 'Safari Sunset'
A. Silber, R. Ganmore-Neumann and J. Ben-Jaacov **205–211**

A leaf-height-seed (LHS) plant ecology strategy scheme
M. Westoby **213–227**

The effect of different N substrates on biological N_2O production from forest and agricultural light textured soils
S. Castaldi and K.A. Smith **229–238**

Denitrification and total N losses from an irrigated sandy-clay loam under maize–wheat cropping system
T. Mahmood, K.A. Malik, S.R.A. Shamsi and M.I. Sajjad **239–250**

Differences in lead tolerance between *Allium cepa* plants developing from seeds and bulbs
E. Michalak and M. Wierzbicka **251–260**

Desert perennials as plant and soil indicators in Eastern Arabia
B. Böer and D. Sargeant **261–266**

Rare earth elements in soil and in soil-grown plants
A. Wyttenbach, V. Furrer, P. Schleppi and L. Tobler **267–273**

Factors affecting soil acidification under legumes I. Effect of potassium supply
C. Tang **275–282**

Nitrogen uptake and use of two contrasting maize hybrids differing in leaf senescence
B.L. Ma and L.M. Dwyer **283–291**

Volume contents **293–295**

Author index **296**
